

# Just to let you know...

## SCIENCE

This week Year 4 have been investigating the properties of solids, liquids and gases. They carried out an experiment to observe ice changing state, from a solid to a liquid then a gas and back to a liquid again! Why not ask your child to explain the process they recorded.

Dear Parents,

Thank you so much for your continued support with sending in resources. Come and see our 'Iron Man', who is standing in the Forum!

Also, please send back your letters regarding the Science Museum and costings for cooking, as soon as possible.

Have a well-deserved Half Term break!

Best wishes,  
Mel, Sheila and Julia.

There will be no spellings to learn over half term. Have a go at all the spellings you have learnt this half term.

Do keep up the tables practice, to keep improving your challenge score!

## Have you seen an Ice Egg?

Something strange and mysterious has landed in the Holy Trinity woods. Large, brightly coloured ice eggs have been found! The children discovered them on Monday morning and have spent the week pondering where they may have come from.

We decided that some of their ideas would make great stories so we have been writing about them all week! We have been using similes to make our writing more interesting, why not ask your child to tell you about their story.

## Maths

We have been looking at data in the form of graphs. The children have had to analyse the information by answering and setting questions.

Year 4 spent some time this week reflecting on their work throughout the half term and thinking about specific areas of Maths they would like to work on more.
