Just to let you know...

Dear parents,

After tackling the ice at the beginning of the week, we have enjoyed an active time, racing around for Sports Relief. On Wednesday, we didn't stop moving in an effort to record as many steps as possible on our pedometers. The school weekly target was 10 million steps!

On Wednesday 28th March, we have our Easter church service at Holy Trinity church in Guildford. We will be walking down at about 9.00am and will be heading back at 10.15am. If you are able to spare some time, we would love some helpers to walk there and back with us. 4J will not be walking back but will be going straight to swimming from church.

Have a great weekend,

James, Rachel and Sarah

Spellings

Thank you for helping your child to learn their spellings.

Spellings for test on 26.03.18

These words are taken from the National Curriculum year 3&4 spelling list. They are often misspelt. Please make sure they know the meaning as well as how to spell it!

circle, describe, different, disappear, exercise, heart, material, occasionally, sentence, straight

English

This week, we have been trying to persuade our readers to buy our crazy inventions. We have been thinking of rich and compelling language, with technical details, to impress and draw in potential customers. We will be adding these persuasive passages to our crazy invention brochures which you can read at our Science Exhibition.

Maths

We have continued with fractions this week, focusing on fractions of an amount. This has culminated in word problems involving fractions. Ask your child what they would do to find 1/5 of a bag of 20 apples. There are some activities on Lumio too.

Homework

For homework the children will be revisiting main clauses and subordinate clauses. Remind them that the main clause makes sense on its own. The subordinate clause gives extra information but doesn't make sense on its own.

This should be handed in by Wednesday 28th March.

Science Exhibition

We are excitedly gearing up for the science spectacle of the year, this Monday 26th March, as we prepare for our Science Exhibition.
Please come along to the exhibition and experience the wonder of materials. The children will be displaying their crazy inventions and trying to persuade you, with their posters and brochures, that you need one in your life!
There will also be a chance to observe some experiments that the children will be able to talk you through.
The children's lab books will be available for your perusal.
All in all, an extraordinary educational exhibition that can't be missed!

The exhibition will be open from 2.30pm—3.00pm. For best results, enter through the doors at the bottom of the ramp. Children can be collected from their classrooms from 3.00pm.

We look forward to seeing you there!
