

HOMEWORK ACTIVITIES

MATHS- We are sending the maths book home for children to complete any unfinished work and to respond to any marking. Children are expected to make a comment below any marking that has been done to indicate to us whether or not they understand the work.

The children have also been given a maths activity to complete which has been stuck in their maths book.

ENGLISH- The children have been given an article (stuck in their reading journal) which they need to read and comment on. What do you think? Do you agree? What can you do to help? This is intended to give them practice when reading and responding to different genres.

BIKEABILITY GROUP 7
STARTS MONDAY 11TH NOV.

Dear Parents,
Next week we are beginning to look at the Scott expedition. Any pre-reading they can do on the internet or in any books would be hugely useful.
If you have yet to book a parent meeting with us please do so as soon as possible. The dates are Tuesday 12th (4-6pm) and Thursday (6-8:30) 14th November.
Best wishes
Clare, Mary, Sarah, Cheryl and Helen

In year group assembly this week we discussed how to keep safe online.
For further information please have a look at the below website:

MATHS
We have been learning about prime numbers, factors and multiples this week. The children have been experimenting creating factor trees, prime number investigations and some long multiplication.
We have added a new mathematics programme for the children to use when practising their skills.
ENGLISH
Using research collected from a variety of sources, we have been writing an introduction to Antarctica this week with the focus being on interesting sentence openers, and paragraphs.

Please could you continue to sign in your child's reading journal when they've read three times during the week. If your children read independently please can you initial to show this.
