

Just to Let you Know

Hazel & Willow

Maths

This week the children have taken part in a variety of practical maths activities .

Everyone had a go at inventing their own practical maths games .

We were amazed by all the different ideas which ranged from bouncing on a space hopper along a number track and then finding 1 more or less than a number, throwing a hoop over cones with numbers on and adding the numbers, to taking away every other number tile from a row of numbers and working out the missing number.

Wild Place

Thank you for signing up to help us. Lets hope that the weather is better next week!

Cooking Corner

We will be making friendly lion faces from fruit.

'Mr Benn at the Circus'

We will be basing our learning on this lovely story. We will be inventing some fun circus tricks in The Rainbow Room with hoops, balancing along a rope, beanbags and skipping ropes etc in preparation for our own circus.

We may even have a lion tamer and a strong man!

We will make circus tickets, write invitations to each other and perform our circus tricks.
