

In topic this week we have been looking our changing coastline and coastal erosion; how it is caused and what its effects are. The BBC website has a nice summary of some of the coastal work we've done this week: http://www.bbc.co.uk/schools/riversandcoasts/coasts/change_coast/pg_02.shtml

Have a look, if you get a chance.

The children looked at pictures of Old Harry Rocks and produced some beautiful watercolours.

Brenscombe Farm Update:

Thank you to everyone who came to the parents' meeting. If you were unable to make it, please ensure that your child's teacher is aware, so we can send handouts home. Please also ensure medical forms are handed back as soon as possible.

Last week the children sent letters to the Swanage Tourist Information Office, requesting details about the area. We received a bundle of brochures about local attractions. This week, the children received letters from a range of people, requesting information about Guildford. They worked together to think about what to include (depending on who their letter was from) and then produced their own brochures.

Just to let you know...

Dear Parents,
Next week will be House cricket for everyone (weather permitting!)
Best wishes,
Bec, Mary and Henry

Group Reading dates

Thursday 3rd May—9.30 am
Thursday 17th May 9.00am
Thursday 24th May—9.30 am
Thursday 31st May 9.00am

In maths this week, we have continued looking at maps and have been planning our journey to Brenscombe Farm. They looked at journey time and cost. Using what they learnt last week to work out distances. Mary's group revised division skill
