

# Year One

## Beech and Oak

### 27th April 2018

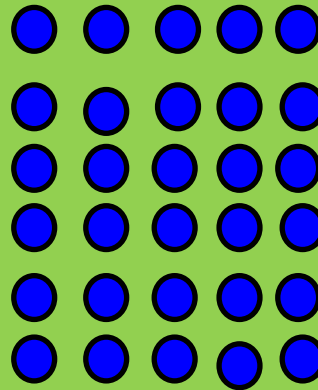

### Writing

This week we have started joining our phase 3 and 5 sounds in handwriting. We have also learnt an adapted version of The Little Red Hen. Next week we are going to adapt this story and write our own! Your children have given fantastic performances of The Little Red Hen, ask them to show you at home.

### Maths

We have continued to use the language of multiplication this week. We've continued to use repeated addition as well as writing "how many lots of" sentences. We have been using our skip counting skills as well as a number line to find the total of groups of objects. Have a go at this one at home:

6 lots of 5 is equal to \_\_

We have had another great week of gardening and talking about what plants need to grow and be healthy. We concluded our science investigation which involved testing if our cress seeds would grow when we deprived them of light or water. We have also been monitoring our runner beans and we are finally starting to see the sprout on some of them!

We have also started our binca sewing this week which has been really fun! We will continue to sew these over the next two weeks.

Have a wonderful weekend,  
Georgie and Claire

### Sun cream

We are finally hitting the summer months and so on days forecasted to be sunny we would like your children to be sent in with sun hats and sun cream already applied. It is fine to send in sun cream with your child so they can top it up too.
