

# Just to let you know...

We've had another fun week exploring Space and centred this week around a lovely Jill Murphy book, 'Whatever Next!'. The children have enjoyed retelling and sequencing the story, being astronauts on a mission to learn about halving and they've also been learning facts about the Moon. They have perfected the Planets Song so should know the order of the planets—ask your child to tell you about it!

Hazel had a fantastic time at the Sportshall event—we were so impressed by their excellent behaviour, good sportsmanship and how hard they tried in all the events, which included: launcher, runner, thrower, pitcher, bowler and jumper! A big thank you to the mums and grandmas that came to help us!

We've been keeping fit whilst taking part in the whole school initiative 'Run to Rio', which means trying to get outside and complete a few laps of the field each day.

Have a super weekend, The Reception Team x

## Practical Maths

If you get a chance, try to incorporate some of the doubling and halving we've been working on, whilst playing at home. You could line up teddies and toys, halve them and double them or role play being in a café and serving up double portions or sharing plates of things.
