

**Friday 26th April**

**Year 2 JTLYK**

### **Dino Dig**

The children were very excited to receive a letter from Chambers Street Museum in Edinburgh informing us that Professor Barrett had found a dinosaur fossil near the Wild Place in the Easter holidays. He asked us to go to the Wild Place to look for more dinosaur fossils. We took magnifying glasses, delicate paint brushes, spades and forks to help us dig out any fragile bones. We were amazed to find so many!

### **Welcome back!**

It has been wonderful to hear about all of the exciting activities the children got up to over the Easter holidays. We hope you had chance to enjoy the glorious weather over the Bank Holiday!

### **Dates**

11th June- Visit to The Natural History Museum. Letter to come.

### **Maths**

This week we have been using what we already know about 2D and 3D shapes to compare different shapes to each other. We have also been using this knowledge to problem solve.

### **Personal best**

This term the children will be competing against themselves to see how many times they can bounce and catch a ball in one minute. We will be collecting their baseline scores next week and hoping that they beat their personal best each week!

### **English**

This week the children wrote some really interesting questions about dinosaurs. They were careful to remember their question marks and even used the '-est' suffix (e.g. biggest, sharpest, fastest)! After our dino dig we replied to Professor Barnett's letter to tell him all about our discoveries. We had to give him details about what they looked like, how big they were and where we found them.
