

Just to let you know...

This week we have studied the features of a biography. The children are now writing one about their sporting hero. We are concentrating on writing carefully with good connections between paragraphs.

Spellings: investigating the words that end in the sound "shun" with various different spelling patterns:

magician, extension, electrician, exclusion, optician, attention, explosion, direction, confusion, reduction.

Bonus words: artery coordinate biography

On Monday we are really looking forward to a visit from a Royal Surrey heart specialist who will be dissecting a pig's heart and lungs. We have always found this to be an excellent opportunity to extend the children's understanding of the human body. Please ask if you have any queries. Well done to all the children who are working so hard on their Baffling Bodies projects—the standard of some is exceptional!

Dear Parents,
Remember, next Friday is Fluffy—please bring in £1
Thank you for your prompt replies to the Natural History Museum letter . It would be great to have them all back by half term.
Best wishes,
Clare, Sarah, Mary , Tracey and Helen

In maths this week, we have worked on coordinates in all four quadrants and symmetry within shapes as well as reflection across a mirror line. Check on mathletics to make sure your child can use coordinates correctly.
Keep up the times table practice too!

As the year progresses we have noticed a drop off in the number of children using their reading records regularly, despite us routinely asking to see them on a Monday morning. Please sign and encourage your child to let us know what they're reading and hand diaries in.

Thank you!

GROUP READING as usual next week.
