

# Just to let you know...

## Maths

During maths this week, the children have been revisiting a number of different areas including, decimals, multiplication and division and 3d shapes, plus a range of problem solving activities. This was really useful as we could focus on areas that the children were less confident in.

## Homework

The children have brought home with them a sheet of multiplication and division questions on both sides. We have asked them to complete the questions using the most efficient method they know, showing their working out in the space provided.

Remember.....

District Sport's Day on Monday 11th July  
School Sport's Day Tuesday 12th July

## Literacy

The children have been researching the different elements of sustainable housing. They have been excited to discover the variety of interesting ways you can build sustainability from grass walls to newspaper insulation. They have then gone on to use this information to create a poster persuading the council to build sustainably.

## Spellings

curiosity  
definite  
desperate  
determined  
dictionary  
disastrous  
embarrass  
excellent  
existence  
materials.

All classes went into Guildford on Thursday afternoon and had the most fabulous time. 5N did a survey on the different shop types, 5S did a traffic Survey and 5G interviewed 316 (!) people to find out their views on the plan and their reasons for being in Guildford. The children were exceptionally well behaved and were a real credit to both you and school. You should feel so proud of them!
