

# Just to let you know...

Dear parents,  
Another busy week has gone by! We have been working really hard in all of our lessons and have been reviewing just how much we have covered this year already. We will be holding a Science Exhibition on the 4th April at 2pm on the ramps and the children should bring their crazy inventions in for this. We hope to see as many of you there as possible.  
Have a great weekend,  
Nick, Sarah and Emily

## Spellings

To be tested on 27.03.19  
and on 29th for 4E.

**Mail/male, scene/seen,  
for/four/fore**

How many other  
homophones can you think  
of? A few more may be  
thrown into the test!

## French

Louise recommends you check out  
this website to watch a film about  
visiting Paris.

## ENGLISH

This week we have been thinking  
about our crazy inventions again.  
We asked everyone to think about  
their design and to come up with  
a set of instructions for how to  
use them. We discussed the use of  
imperative verbs and how they  
can add direction and purpose to  
the instructions.

## Homework

We have had fun advertising each other as  
desirable commodities in preparation for our  
poster homework. The children can work  
from the plans in their homework book to  
produce a poster to advertise their crazy  
invention.

## MATHS

In maths we have been  
looking at the internal  
angles of triangles and  
quadrilaterals. We cut the  
corners off of a triangle  
to show that combined  
they equal 180°. We also  
looked at ways to find  
missing angles through  
addition and subtraction.
