

Just to let you know...

Dear parents,
This week we have begun thinking about the Easter story and its deeper meaning. We will continue thinking about Easter next week and will be heading to Holy Trinity Church on Wednesday for our Easter service. If you are able to help walk the children down please let us know.

We've also been busy planning for our **Great Science Exhibition!** This will be on the 4th April at 2pm on the ramps and the children should **bring their crazy inventions in for this.** We hope to see as many of you there as possible.

Have a great weekend,
Nick, Sarah and Emily

★ Easter Gardens ★
★ On Monday we are having our annual Easter Garden competition. ★
★ The children are allowed to bring in natural resources to build their gardens e.g. moss, small flowers, ★
★ pebbles, etc. A tray or bowl is advisable for the base. ★

═══
ENGLISH
In English this week we have been looking at writing persuasively and how to advertise our Crazy Inventions. We discussed how to use a rich and varied vocabulary in order to convince potential customers that our inventions are worth having.

═══
Spellings
international, intergalactic, intertwine,
interrupt, intervene, antidote, antibiotic,
antihistamine, antihero

All classes to be tested on 3rd April.

═══
Homework
The time has come for the crazy inventions to become a reality. We would love the children to build real models of their designs. We would really like these to be brought into school on Thursday morning, ready for our exhibition that afternoon.

MATHS

This week in maths we have been looking at translations. Every point in the shape is **translated** the same distance in the same direction. It looks straight forward, but many of the children found it a real challenge. Could you describe the translation below?
