

Year One Beech and Oak 4th May 2018

Writing

We have continued performing the story of The Little Red Hen this week, before we adapted it into our own stories. Lots of creative adjectives were used to describe our different characters, not to mention the funny things for our characters to plant instead of the little red hen's corn. We really did get some imaginative ideas!

Maths

This week we have explored division through the language of sharing between equal groups. Rather than using the sign for division (\div) we talked about sharing into equal groups. This encourages a deeper understanding of the concept of division as children repeatedly hear what basic division means. Have a go at this question at home:

I have 18 toy cars. I need to share them between 3 of my friends.
How many cars do they get each?

__ shared between __ = __

We have had another busy week filled with story writing and continuing to learn about parts of plants and their functions. We've also used herbs in our classrooms to add flavour to the falafels and salad we prepared on Tuesday morning! We really enjoyed talking about the flavours we could taste and which ones we liked best.

This week, we sent out the consent forms for our Wisley trip which is taking place on Monday the 14th of May. We would really appreciate it if these could be signed and returned to us by Tuesday the 8th May.

We hope you have a wonderful bank holiday!
Georgie and Claire
