

HOMEWORK ACTIVITIES

MATHS- This week we will be sending their maths books home with homework calculating fractions. As always, we have asked the children to ensure that their class work is completed and marking has been responded to.

ENGLISH- The children are bringing home their SPAG books with a list of their own frequently mis-spelt words in. Please help them practise these at home (look, say, cover, write, check).

Just to let you know...

BIKEABILITY GROUP 8
STARTS MONDAY 18TH NOV.

So far we only have a few shoeboxes for our Christmas Appeal—please make time this weekend to sort out some little gifts and bring in a wrapped shoebox on Monday.

Please could you continue to sign in your child's reading journal when they've read three times during the week. If your children read independently please can you initial to show this.

Also try to keep up the regular reading over half term—we'll be moving on to a study of Antarctica so any background reading would help!

Dear Parents,

Thank you for coming to see us this week. It was good to touch base with you about your child's progress and discuss how they have settled into Year 6.

Thank you for your continued support.

Best wishes
Clare, Mary, Sarah, Cheryl and Helen

MATHS

We have been learning about fractions of amounts and the relationship between fractions, decimals and percentages. This is in preparation for next week when we will be investigating aspects Antarctica and applying our knowledge.

We have added a new mathematics programme for the children to use when practising their skills.

ENGLISH

We have introduced the heroic deeds of Scott and Amundsen and the children are now telling this adventure in their own words.
