

JTLYK Reception

Friday 16th November 2018

Maths Walk

Yesterday we went on a maths walk to look for numbers. We found them on car registration plates, on gates and front doors, on official street signs and billboards. It is important that children have an awareness that maths is all around us and a part of our everyday lives. When you are walking to and from school, or out and about at the weekends, encourage your child to look out for numbers. Ask them to tell you which numbers they can see.

Phonics

This week's sounds are

b, f, l

Now that we have learned quite a number of sounds please help your child to consolidate their learning by making sure that they can remember all of the sounds in the back of the JTLYK book. Thank you!

Dear Parents

We have really enjoyed meeting you this week to talk about your lovely children! We officially meet again in the Spring but if you would like to chat about your child before then, please pop in and we can arrange a suitable time!

Next week is 'Beep Beep Week' when the children will learn all about safety around and on the roads. On Friday 23rd the children are invited to come to school wearing brightly coloured clothing. We will take part in a special assembly and the prizes for the poster competition will be awarded (posters have already been designed and made at school).

Have a restful weekend!

The Reception Team :))
