

Magical Maths Mat

I can multiply and divide numbers mentally, drawing upon known facts.

Play this game with a partner. Take it in turns to roll a dice and get your number. Then, roll again to find out the calculation you need to do (you can work these out mentally using the strategies you've practised!). Finally, roll again to find your action.

Mix it up by changing the numbers in this row!

86	230	326	48	504	62
Multiply by 9.	Multiply by 5.	Multiply by 4 Divide by 4	Multiply by 50.	Multiply by 15 Divide by 15	Multiply by 11.
Have another go.	Say your twelve times table backwards.	Add together the ages of you and your partner and multiply them by fifty.	Miss a turn.	Recite your eight times table as fast as you can.	Hop up and down 20 times while you count in sevens.
