

## Phonics

After all their hard work this term, we will be assessing the children's phonic progress.

In class we will continue to practise writing joined up digraphs. Do keep looking at the Phase 3 sound mat with your child.  
Can they spot the sounds in their reading book?  
Can they write words containing these sounds in their JTLYK books?

## ZooBob Update!

ZooBob left a mysterious object in the Rainbow Room for the children to investigate. It was thought to be an alien minibeast cocoon... The children set about predicting what kind of minibeast hybrid might be inside. They drew designs and constructed models using giant equipment and blocks.

Hazel Class received a letter from ZooBob asking for their help. His spaceship had landed in a field, completely covering his ship in minibeasts. The children helped by drawing, writing and making maps to help him identify the minibeasts.

ZooBob is due to land in the Rainbow Room on Thursday morning so the children can finally meet him and share all they have learnt about minibeasts on planet Earth!

## This Week

We will be continuing to track the progress of our caterpillars but we will also be moving on to learning about frogs and tadpoles.

We're particularly excited about going pond dipping!

## Reception JTLYK Hazel & Willow

## Cooking Corner Frogspawn Jelly!

(we will be using veggie jelly)

## The Very Hungry Caterpillar

In Willow, some of the children put on a show of The Very Hungry Caterpillar for the rest of the class. They made posters, tickets and sorted out the seating arrangements. They each organised themselves into different roles. It was a lovely performance and even Ruth came as a VIP!
