

Just to let you know...

ENGLISH

This week the children have been given the task of choosing and researching a plant species. The focus has been to use a range of non-fiction text to research and collate relevant information. They have used books and the internet to research their plant.

Words of the Week

knife	co-ordinate
knives	axis
life	origin
lives	point
belief	quadrant
believes	treasure
glove	fraction
gloves	share
safe	divide
saves	multiply

In group maths this week we have worked on some fraction fun!

Try a few fraction problems at home e.g. what fraction of their weekend is spent playing, eating, sleeping?

In class maths we have looked at co-ordinates and the children have plotted key landmarks on their own islands using co-ordinates.

Times tables tests are on Thursdays. Please login to the My Maths site for a range of times table practice activities. Children should try between Levels 2 and 4. Thank you for helping out at home.

Have a great weekend!

Best wishes

Alison, Nick, Tracey, Emma and

SCIENCE

In science we continue to observe our seed mazes, some of which are making their way towards the top! Ask your child how their plant is getting on.

We have started a new experiment investigating the different factors that affect seed germination. In this case...cress!

Thank you to all who have sent back their Bentley Copse forms. We are still waiting on a few forms to come in.
