

Dear Families,

You have been invited to the Royal Institute (RI) Community Science show 'Super Cells' at Kings College at 4pm on Thursday 4th July.

What makes you sick? Why do you, I, and every other human on the planet get ill? Join our RI presenters as they dive deep into your very own cells to see how bacteria and viruses invade our bodies and try to take over, and more importantly: what can we do to fight back? From ancient remedies to modern medicines, we'll see how science supports and improves our bodies' natural defenses, from antibiotics to vaccines, to a future where we could train our bodies to potentially cure themselves of some diseases!

The show gives families a chance to see the RI's specially trained presenters in action, delivering science shows inspired by medicine. The show will be jam-packed with experiments, demonstrations and the odd explosion!

Tickets will be allocated on a first come, first served basis. To reserve a seat, please follow the link:
