

# SCIENCE

## Festival 2026

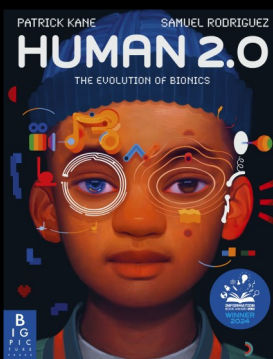

CATERHAM  
SCHOOL

Saturday 24 January 10.30am—1.30pm

### Join us for a super science Saturday for fascinating talks and sessions with leading scientists!

In addition to our stellar line up of talks below, planetarium shows will run throughout the morning alongside the Oculus VR and Augmented Reality Room.

We also are delighted to be joined by the Crawley Astronomical Society and their portable solar telescopes, offering visitors a chance to safely view the Sun, including sunspots and solar activity, weather permitting. CAS runs the StarLab observatory at Copthorne Prep School (part of the Caterham Family of Schools) and works with pupils to bring astronomy to life both during the day and in evening sessions.

### Human 2.0

Patrick Kane

Explore and celebrate the remarkable achievements made in medical engineering and gain a glimpse of what the future might hold for humanity.

People with paraplegia can walk again, those who are hearing impaired can listen to even the faintest sounds, and some people with missing limbs can create beautiful works of art. This phenomenal book is a celebration of all that has been achieved so far, and a look at what might be possible in the near future...

### What If?

Emma Young

What if every volcano exploded at once? What if every tree vanished overnight? What if you only ate cockroaches for a year? Join Emma Young for an exciting and interactive talk.

Packed with fascinating facts about the human body and the earth that are guaranteed to change the way readers think about anatomy and our planet, Young explains each answer with humour and plenty of science facts that readers will be racing to share with their friends and family.

Books will be available to purchase & each talk will be followed by book signings. Thank you to Village Books in Dulwich Village for being the official bookseller of our festival!
